

Satisfied patients. Growing practice. Happier you.

Thermage is the premier solution for skin tightening and contouring. It delivers natural looking results with next to no downtime for patients—with the industry's only single treatment, non-invasive procedure. That means it's the right fit for patients' lifestyles—and the right fit for your aesthetic practice.

As the pioneer of non-invasive skin tightening, Thermage has a track record of success in patient demand, clinical results, advanced technology and constant innovation. Best of all, Thermage is one of the most profitable procedures you can bring into your practice.

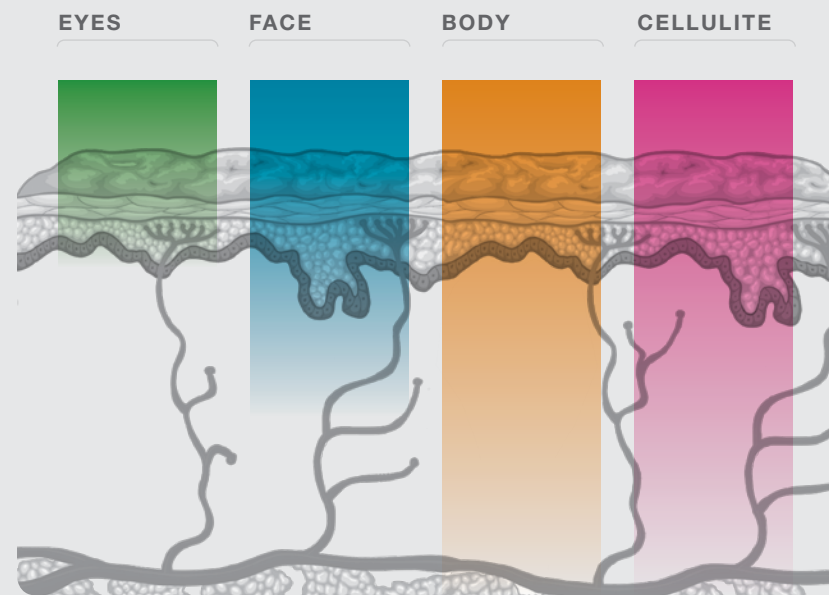

Each treatment tip features a unique heating profile, enabling RF energy to penetrate the dermis and subcutaneous tissue at different depths to tighten existing collagen and stimulate new growth.

SUPERIOR TECHNOLOGY. SUPERIOR TIGHTENING.

Thermage is the only device to use monopolar capacitively coupled radiofrequency (RF) energy. This patented technology enables deep, uniform, volumetric heating that other systems simply can't deliver.

While light-based devices and other RF technologies treat the superficial skin layers, Thermage can reach deep into the dermis and subcutaneous tissue.

The Thermage system consists of a single platform with a variety of treatment tips. This gives you the flexibility to customize treatments for different needs:

Treat various body areas - such as the face, eyes, lips, abdomen, arms, hands, thighs and buttocks.

With multiple benefits - like skin tightening, contouring, body shaping and temporary improvement in the appearance of cellulite.

All with one system - just change the handpiece or tip.

CONTROL IN THE PALM OF YOUR HAND: THERMAGE NXT HANDPIECES

Comfort. Ergonomic and light, the NXT handpieces are easy to handle, with no operator fatigue.

Freedom. Integrated remote controls let you change settings without returning to the console, and a long cord gives you increased mobility.

Safety. An internal force sensor ensures safe contact between the skin and the treatment tip.

Face Handpiece

Body Handpiece

FLEXIBLE AND EASY TO USE

- Streamlined operating system
- User-friendly interface
- Integrated cooling system
- Smaller footprint to fit any practice

NXT System

Power and flexibility at your fingertips

With the range of Thermage tips, each engineered for a different application, you can treat a wide variety of patients with a single platform

thermage®
EYE TIP
0.25

Our specially designed Thermage Eye Tip 0.25 uses precise, shallow heating to smooth and tighten the skin of the upper and lower eyelids, reduce hooding and soften fine lines and crow's feet to help your patients look younger and refreshed.

The innovative Thermage Body Tip 16.0

Deep contouring to give your patients the body shaping and cellulite results they are asking for

thermage®
BODY TIP
16.0

With the Thermage Body Tip 16.0, you can provide effective body treatments in half the time—and with greater comfort. With five times the coverage of our standard body tips and featuring our innovative *Comfort Pulse Technology™*, the Thermage Body Tip 16.0 takes body shaping to new levels of speed and comfort.

- Deliver impressive results twice as fast
- Offer patients greater comfort during the procedure with *Comfort Pulse Technology*
- Ensure high patient satisfaction through both the procedure experience and the results

The Thermage Body Tip 16.0 employs **Comfort Pulse Technology**, a new energy delivery method designed to improve patient comfort while maximizing efficacy. The 16.0 Body Handpiece enables this innovative technology to deliver the energy with short, rapid pulses at varying energy levels over the duration of the Radiofrequency Energy Pulse, which provides deep heating of the tissue at a therapeutic level that patients find easily tolerable.

Proven results for body shaping and cellulite reduction

Thermage answers the demand with deep heating tips that are creating great results—for patients and practices

thermage
BODY TIP
3.0

Like the Thermage Body Tip 16.0, the Thermage Body Tip 3.0 treats deeply to contour and tighten skin; addressing sagging skin and unwanted bulges. Patients often see immediate tightening and contouring results that get better with time.

Grow your practice with Thermage

A great choice for your business, a beautiful option for your patients

Bring Thermage to your practice and offer patients a unique, proven alternative to more invasive treatments. Thermage expands your offerings to support the growth you value and the results your patients want. That's why more and more practices are incorporating Thermage.

Here are some reasons for their confidence:

- More than half a million treatments performed—and counting
- More than 2,300 practices in 80 countries
- 50 peer-reviewed articles—the most clinical evidence in the non-invasive aesthetic industry
- More than 50 patents for advanced technology
- FDA clearance for the non-invasive treatment of wrinkles and rhytids, as well as temporary improvement in the appearance of cellulite
- The first and only FDA clearance for non-invasive eyelid treatments

Backed by the longest history of non-invasive skin tightening treatments, Thermage has the strongest record of proven results, safety and clinical excellence.

All Before and After photos are un-retouched and represent patients who have had significant results. Results vary depending on age and skin condition. FDA cleared for the non-invasive treatment of wrinkles and rhytids, including the upper and lower eyelids, and for the temporary improvement in the appearance of cellulite. Side effects are generally mild and may include redness, swelling, blisters, bumps and rare instances of surface irregularities. © 2009 Solta Medical, Inc.
